## A MIGHTY MONOPOLY.

The big, bounding monopoly idea could scarcely have a more splendid exponent than the Sugar Trust, the story of whose recent manipulations in Wall street was told in yesterday's Evening World. It is potent, and quiet, and conscienceless. It has proyen itself able to the utmost, even against all the heads in "the street." The decline of Sugar Trust stock from 120 to the neighborhood of 80 was accomplished, with malice prepense, in the ince of a trade heavier than that in almost any other security in the marke'. Small dealers, dabbling along in the belief that the raid was temporary and from without, kept giving up money and hoping for reaction. Meantime the Sugar Kings, themselves the moving force, were busy buying on the de-

Now, with half Wall street screaming about its ears, the Trust sits down beside its gains, content for the time. The magnates have got back the majority of the stock originally parted with, besides pocketing a bigger winning than the most prosperous state of their vast refineries would have afforded.

It was Napoleonic. It was a giant stride towards complete mastery of the sugar business. The goal is not far off, either, and there is evil omen enough for the consumer in the success of this latest operation. CLAUS SPRECKELS has a big job shead.

It is quite a business firm, and something of an infant industry, that has such absolute power over the Congress of the United States.

Some kind philanthropist who does not eredit the theory of original sin, please step forward and explain the "external influences" that made two little boys, TIMOTHY Denouve and Joseph Connon, scale the structures of the the Elevated Railroad at Eightyseventh street and put stones on the track.

The cruiser Baltimore, it is rumored, isn't, after all, such great shakes as they told us she was. Some naval engineer made a mistake in his arithmetic. Now it is removed that instead of exceeding the horse power called for in the contract, the Baltimore falls short of it. So the chief prop of our pride is knocked from under us, and all this blow and brag and hand-shake has been for nothing.

SULLIVAN'S political boom has found local habitation. His pushers are going to run him in Gen. PAT COLLINS's old district, and until the Big Fellow goes up against the present incumbent, O'NEIL, he'll never know what a good hard scrap means.

THE NEW HARLEM OPERA-HOUSE.

Being a Harlemite is rather nice, after all. I could not repress a thrill of legitimate pride that shot itself through my frame last night, as I stood on the threshold of the noble operase constructed by the lavish and elaborate Oscar Hammerstein. It was worth long months of waiting for. It compensated me for the jeers of downtown friends, who declined to understand why a sane man should perch himself up in Harlem. I had my own little reasons for Hartemizing, and was not obliged to divulge

a necessity. the fleas came I was again confrouted by my friends. How could I endure it? I replied scornfully that fleas only liked nice, wholesome people, and their advent into Harlem was simply a compliment to that lovely air I have mentioned before. The fleas mealed themselves upon me most gluttenously, and I certainly wished I wasn't so frightfully healthy: but I never slighted Harlem. I bore it all like the

night as we met at the Opera-House. They had been obliged to come up to it. About the only thing Hammerstein hasn't done for it, is to have furnished it with wheels to take it downtown, A walk of a few blocks: no weary training, none of the discomfort of visiting a strange region -yes, it was delicious. Everybody from down-town envied me. My innings had come at last. The new Opera-Honse is one of the hand; somest theatres in the country. It is a marvel of luxury; a poem of modern improvements. You enter a long, brilliantly lighted hall and have quite a little walk before you get to the That in itself is pleasant, Most of our theatres to-day are too close to the street. After you have passed through the hall of the new Opera-House you enter a brilliantly lighted foyer, carpeted luxuriously and charmingly decorated. The only feature I didn't like about it was the bright blue of the walls, which seemed to me rather barbaric. The ancient Britons, thirsting for decoration, stained their bodies Liverpool. The young ladies braid their hair as thirsting for decoration, stained their bodies tightly as a Greichen, plaster it with fine hairpins blue with woad, and I imagine it was just the and cover their heads and foreheads with the severest same blue that is found on the walls of the Har-

Mr. Hammerstein is to be congratulated on his foyer. It is a superb lounging place, where I see no reason why, between the acts, ladies should not promenade, just as they do in the French theatres, instead of sitting cooped up and envying the men who go out. The foyer is wide and comfortable. The Harlemites were loud in its praise last night.

The Theatre itself is extremely handsome The scats are comfortable to sit upon and delightful to look at in their electric blue upholstery. The boxes are tastefully arranged, and ladies will be delighted to know that occupants are distinctly visible. Miss Lotta's diamond trinkets were in complete exhibition in a box last night. Incidentally, Miss Lotta was at tached to them, but there were more diamonds than Lotta.

The curtain shows Shakespeare reading a play to Queen Elizabeth, and is painted in very bright colors. Shakespeare appears to like Harlem. There is a wort of satisfaction visible on his face. It did me good to notice this, know that the downtowners would sooner have seen Shakespeare frowning.

"The Wife" was the play that opened the new Opera-House, and it seemed fitting that this excellent American comely should have been selected. It was capitally given, though was not possible to forget the original Lyceum company, in the acting of these No. 2 imitators. I was surprised to see that Miss Frances Gaunt imitated Miss Grace Henderson-walk, contralto tones, and Mrs. Berlan Gibbs made a very charming Helen. How the Neglected Empress Retaliated on a Reyal Rival.

Napoleon often used to disgrace the Empress Eugenie by the openness of his intrigues, and wounded by these affairs she several times attempted to leave his court and his throne, says the Philadelphia Press, One of her retaliations was very amusing. The Countess Castiglione was then the favorite of the hour. The Emperor had openly in-

Five Members Meet at the Chamber of Commerce and Adjourn.

More Responses and Suggestions Received by Mayor Grant.

The Executive Committee of the Finance Committee of the World's Fair met in the rooms of the Chamber of Commerce, at 12,30 this af-

Five members were present. They were : Samuel D. Babcock, J. Pierpont Morgan, Cornelius Vanderbitt, August Belmont and J. Edward Simmons.

The Committee met with closed doors, and when they opened it was said that Secretary Wilson had been directed to call a meeting of the full committee of twenty-live for next Tuesday at 12, 30.

Chairman Wilson refused to say whether i p an had been decided upon. A meeting had been called, he said, for next Thesday, and at that time something important might be done. It is evident that there is a deep underlying sentiment in opposition to the desecration of Central Park by using it or any part of it for the World's Fair, and this sentiment is expressed respectfully and without unnecessary exhibition of opposition to the Committee on Site, by suggestions and plans submitted to the Com nittee from every quarter, and always providing for the erection of the buildings on some other part of the proposed site-in Riverside Park, Morningside or the vacant ground north

of Central Park.

The Mayor's Fair mail was not so great to-day as on former days, but there was enough.

A crutar-letter date i at Chicago, addressed to the State of Olio and signed "Charles E. Blinis, President of the Ohio Anvillary of Chicago," was received by Mayor Grant.

It sets forth a lot of alleged reasons why the Fair should be located in the Windy City, and winds up by saving that Chicago was once a part of Wayne Country, O., and that it is because of this fact that it is the liveliest town on carth, though it was long ago cut out of the Buckeye State by the formation of the States of Indiana and Illinois. He put up at the St. James. Yesterday Mr. Carson drove to the house of his prospective bride, who resides with her mother at 244 West Twenty-third street. From there the couple were driven to the

residence of an Episcopal minister, pastor of a well-known church uptown. The reverend gentleman questioned the pair closely and succeeded in eliciting the fact that

seems to have been made by the persistent comple.

Mr. Carson was not at his hotel this morning when The Eventso World reporter called, and the natural inference was that he had gone to see Miss Harrison. A cab was seen in front of the door of 944 West Twenty-third street.

The cabman was a good-natured, communicative sort of a fellow, and he admitted that Mr. Carson was in the and that he was waiting to drive him and Miss Harrison to breakfast at the St. Jaimes. A pull at the bell brought Mrs. Harrison to the door.

She denied that any marriage ceremony was taking place and that Mr. Carson was in the

Within ten minutes after the reporter left, Mr. Carson and Miss Harrison came down the stoop and cutered the cab. The reporter saw them from a convenient doorway.

They were not out of sight when a very young Eps-common minister left the house and walked raphily east.

The roporter overhauled him.
"Did you just marry Miss Mand Harrison and Mr. Carson ?" he saked.
"No. sir; I did not," he replied, with an affrichted air, and then sped up the street like a deer. Not another question would be answer. He appeared to be angry with some one.

Then the reporter went back to the St. James.
Miss Hairison and Mr. Carson were discussing

The reporter sent in a card asking if the marriage ceremony was performed this morning.
The answer sent back was: "No."

A Newspaper Man Gives a Chapter in

Personal Experience. "It was ten years ago, while doing newspaper work

in the upper lake towns, that my trouble began."

The speaker, says the Cincinnati Fines-Eigr, was J.
P. Thornbury, for years connected with the Cincinnati press, and now living at 255 West 7th street.

"I was unused to the climate up there," Mr. Thorn-bury west on, "and before I knew it I was laid up with a cold. At Cleveland I was confined to my bed. A ranking cough got hold on me and racking cough got hold on me, and it wasn't very long before I was in the hands of the doctors, who told me

before I was in the names of the dectors, who told me that I had communition and ordered me Fouth. "Well, Cincinnati was as far south as I got. It had always been my bome, and I know I would be taken care of here. For five weeks after I got here I was laid up about as sick as a man could be and live through it

could be around again.

"But since then I have never been strong. Though I have had no such sudden or violent stacks, it seems as if all the time I have been steadily failing. The cough

could return to me on the slightest exposure, each time seeming to be worse than before. "My throat began to trouble me. I began to have restless nights, and in the morning I would feel tired and worn out before the day's work was fairly begun. My throat would choke up, and

MR. J. P. THORNBURY, 255 West 7th at it seemed hard for me to got air into my lungs. My breath would come short, and there would seem to be a sort of crackling or wheezing in my chest. Sometimes sponge.

"Then I would have violent headaches, lasting days at a time, and all the time a dull, compressed feeling over my eyes. I would have be: feverish flashes come over me. My nose would be stopped up, and I would raise a great deal of mucus, sometimes of a vellowish or of a greenish character, and in late years often streaked " I would have a pain or sense of weight or oppression

in my stomach, especially acter eating. Sometimes I would feel very hungry and think I could eat a great deal; but after I sat down to the table the first two or three mouthfuls would satisfy me. I could eat no more, "Doctor? Oh, yes; I was doctored by everybody for everything-dyspepsis, liver complaint, nervous trouble, lung trouble and so forth. But I didn't get any batter. I experimented until I got sick of taking medicine and

quit taking any,
"Then I will tell you. Last October my headaches and the trouble in my throat and atomach got so had that I could not work and at times could scarcely think. Even my memory seemed to be failing me, and I became despondent and gloomy. It was then that I saw troubles which were very much like mine described by patients who had been treated and cured by Dr. Blair and his associates. It was after reading these that I formed for myself the opinion that I had catarrh of the head, throat and stomach, which opinion was in the main confirmed by Dr. Blair himself in a consultation that I had

with bim shortly after.
"Well, I went under his treatment. I was patient and did not expect toe much on the start. My trouble had been years in coming on, and I did not expect to get 11d of it in a dzy. I could seen see, however, that I was improving. My headaches stopped entirely; my appetite improved and seen I could hardly get enough to eat. I tolt as if I had taken a new leave on life. My head and throat became clear. I gained in weight and strength and now I am as well as I ever was. Not a trace

of my trouble remains. " Mr. Thornbury, as stated, lives at 255 West 7th street. He is now Scaretary of the American Live Stock Protective Association, at Lincoln Inn Court, the latter place being his post-office address. He was for a time editor of the Kentucky Revald, the daily paper printed for Covington and Newport, and in past years has creditably filled various positions on the Chacinnati

When catarrh has existed in the head and upper parts in a district where people are subject to catarrhal affection, and the disease has been left uncored, the catarrh avariably, sometimes slowly, extends down the wind pupe and into the bronchial tutes, which tubes convey the air into the different parts of the lungs. The tubes become affected from the swelling and the mucus arising from catarril, and in some instances become plugged up so that the air cannot get in as freely as it should. Short-ness of breath follows, and the patient breathes with

ng inside the chest. At this stage preathing is usually more rapid than when in health. The patient has also hot flashes over his body. The pain which accompanies this condition is of a dull character, felt in the chest, behind the breast bone or nder the shoulder blade. The pain may come and goast a few days and then be absent for several others. catarrh is dry, comes at intervals, is backing in charac-

first evidence of the disease extending in the lungs. At first there may be nothing brought up by the cough, then there is a little tough, tenacious mucus, which the patient finds great difficulty in bringing up. Sometimes there are fits of coughing induced by the ough mucus—so violent as to cause vomiting. Later on the mucus that is raised is found to contain some parthe mucus that is raised is found to contain some par-ticles of yellow matter, which indicates that the small tubes in the lungs are now affected. With this there are

often streaks of blood mixed with the mucus. In same cause the patient becomes very pale, has fever and sxpectorates before any cough appears. In some cases small masses of cheesy substance are spit up, which, when pressed between the fingers, emisa bad odor; in other cases particles of a hard, chalky nature are spit up. The raising of cheesy or chalky lumps indicates serious mischief at work in the lungs. In some cases catarrh will extend into the lungs in a few weeks; in other cases it may be months, and ever years, before the disease attacks the lungs sufficiently to cause serious interference with the general health.

patient is said to have catarrhal consumption. With bronchial catarrh there is more or less fever, which differs with the different parts of the day-slight in the morning, higher in the atternoon and evening. Sometimes during the day the patient has a creeping, chilly sensation, which may last from half an hour to an hour, the surface of the body feeling dry and hot. Dur-

Such sweats are known as night sweats. The pulse is usually more rapid than normal, and the patient loses flosh and strength. A fresh cold is all that is needed at this point to develop rapid consumption. In some instances the patient loses strength and firsh slowly. The muscles gradually waste away. Then the patient gradually regains some of his strength.

only to lose it again.

A weak stomach and a dislike for food, which seems to have lost its taste, cause the patient to think that he has a disease of the stomach instead of the lungs. With those diarrhora usually occurs and there is the same disturbance of the kidneys. In bronchial catarris the voice often becomes weak, husky and boarse. There is a burning pain in the throat, with difficulty in swal-
